### Carbon Reduction Plan

Supplier name: CSL Behring UK Ltd

Publication date: 20 June 2024

### Commitment to achieving Net Zero

CSL Behring UK Ltd is committed to achieving Net Zero emissions by 2050.

#### **Baseline Emissions Footprint**

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline Year: 2022		
Additional Details relating to the Baseline Emissions calculations.		
We have formalised our approach to meet the requirement of PPN-06/21 and can report against these requirements from 2022.		
Baseline year emissions:		
EMISSIONS	TOTAL (tCO₂e)	
Scope 1	2.16864 t CO2	
Scope 2	18.89737 t CO2	
Scope 3 (Included Sources)	Isolation not available	
Total Emissions Scope 1&2	21.06601 t CO2	

Reporting Year: 2023		
EMISSIONS	TOTAL (tCO <sub>2</sub> e)	
Scope 1	7.77693 t CO2	
Scope 2	16.46346 t CO2	
Scope 3	3.542714 t CO2	
Total Emissions	27.783104 t CO2	

#### **Emissions reduction targets**

CSL Behring UK Ltd is committed to achieving Net Zero emissions by 2050.

In the UK it operates as CSL Behring UK Ltd, a commercial head office entity based in a multi tenanted office building with utilities provide by the Landlord. On lease takeover in 2017 CSL Behring installed motion sensors in the offices and LED lighting.

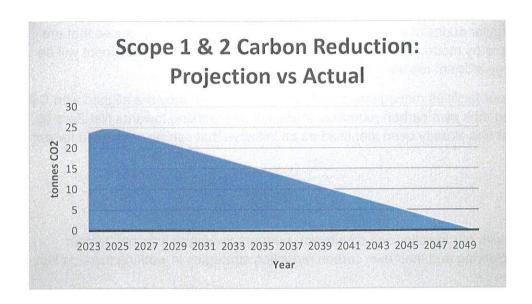

Progress against Net Zero commitment in Scope 1 and Scope 2 will be tracked annually and the graph below will be updated.

A majority, more than 80%, of CSL Behring UK's upstream emissions for warehousing and logistics are covered by the third party's own Carbon Reduction Plan

In order to continue our progress to achieving Net Zero, we have adopted the following carbon reduction targets.

We project that Scope 1 and 2 carbon emissions will decrease over the next seven years to 20 tCO2e by 2030. This is a reduction of over 10% on our current 2023 Scope 1 and 2 emissions.

Progress against these targets can be seen in the graph below:

### **Carbon Reduction Projects**

#### Completed Carbon Reduction Initiatives

The following environmental management measures and projects have been completed or implemented since the 2022 baseline.

#### Scope 1

- We have revised our company vehicle policy and introduced an e-vehicle and hybrid company car provider that is available for the wider workforce and reinforces our commitment to sustainable travel beyond business journeys.
- We have introduced working practices to reduce carbon emissions by allowing office based staff to reduce their office attendance to a minimum of 25% and to optimise digital technologies to remotely support the business creating a greater agile working environment for CSL Behring employees.

#### Scope 3

 We are working with and supporting our logistics and distribution partner, our largest supplier, in their Upstream reduction plans and Net Zero journey.

In the future we intend to implement further measures for Scope 1, Scope 2 and Scope 3 such as:

#### Scope 1 and Scope 2

 We will aim to reduce business travel by utilising and optimising digital technologies to support the business and encourage car sharing where practical.

#### Scope 2

 We will educate and raise awareness to our colleagues of the energy efficient measures that we will implement.

- We will perform regular audits of the office and monitor equipment and appliances that are typically left on stand by mode. Redundant equipment will be retired, old equipment will be assessed for energy efficient replacements.
- We will work with our facilities management provider to ensure that they are aligned with CSL Behring in adopting their own carbon reduction strategies and working towards Net Zero by 2050. Solar power has already been identified as an initiative that can be developed for our premises.

#### Scope 3

- Continue working with our logistics and distribution partners to ensure that they remain aligned with CSL Behring and their own carbon reduction strategies in working towards Net Zero by 2050.
- Review and engage with our suppliers to determine that they have set their own Scope 1 and Scope 2 reduction targets.

We will continue to review our Scope 3 emissions to establish further carbon reduction opportunities.

### **Declaration and Sign Off**

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard<sup>1</sup> and uses the appropriate Government emission conversion factors for greenhouse gas company reporting<sup>2</sup>.

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard<sup>3</sup>.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).

Signed on behalf of the Supplier:
